

European School Education Platform

PROJECT ● Active

EUROPEAN DISHES

European Dishes is an international eTwinning project that brings together students from different cities and countries through cooking. Each participating school presents its country by selecting typical dishes from its tradition. The students search for recipes and cook them, preparing video recipes for a digital book. In a second phase, the students will focus on recreating typical dishes from countries bordering their own and write them in the digital book. The project aims to increase students' social and cultural awareness, while helping them to

remember and appreciate the culinary values of their own country. At the same time, it focuses on improving students' language skills through listening, reading, pronunciation, conversation, and writing activities. By combining cooking, culture, and language learning, students give voice to the cultural identity of their cities in English.

Vocational subjects of teaching:

[Catering and Tourism](#)

Key competences:

[Citizenship](#) [Cultural awareness and expression](#) [Digital](#)
[Personal, social and learning to learn](#)

Aims

1. written and oral production in English by searching for and writing recipes, and will improve their reading comprehension by analyzing recipes (with specific terminology) in their native language and in English; they will expand their English vocabulary related to food and cooking, as well as culture; 2. experience in the oral and written presentation of recipes, as well as their history and caloric properties; 3. increase social and cultural awareness by recognizing and remembering the culinary values and traditional heritage of their local area and neighboring countries; 4. become familiar with IT tools for creating a digital book to present their work to an online audience 5. develop digital skills by using online tools for research, collaboration, and presentation

Expected Results

By the end of the project, the following results are expected: 1. A TwinSpace public space presenting all the project's activities and results; 2. A digital book presenting recipes from their own country and neighboring countries, their history, and nutritional and caloric characteristics; 3. A digital map of Europe showing the regions where the various dishes originate (included in the digital book); In addition to these final products, the project should lead to: - Improved student skills in English conversation, pronunciation, and reading - Greater confidence in using English in front of an audience - Greater awareness of the culinary heritage linked to the students' cities - Development of digital skills through collaborative online tools
